WHAT YOU WILL LEARN

At this skill building bootcamp, Amit Jotwani from the Alexa Skills Kit team will be onsite to help you add your own skills to Alexa. You will leave having created an Amazon Skill and will be able to create more skills that tie into Alexa Voice Services.

WHY YOU SHOULD LEARN TO CREATE ALEXA SKILLS

Once certified, your new skills will be published in the Alexa app which will in and of itself be a great addition to your portfolio. Second, you'll gain experience with three services: Amazon's Alexa Skills Kit, AWS Lambda (part of Amazon Web Services), and the NodeJS backend JavaScript framework.

WHO SHOULD ATTEND

This bootcamp is appropriate for developers and non-developers alike.

For more information or to register for this free bootcamp, go to:

Session 1: <http://bit.ly/AWSBootcamp1>

Session 2: <http://bit.ly/AWSBootcamp2>

Seating is limited. Sign up early.
